

OXO | ON

design by Gabriel Teixido

ZON
INTERNATIONAL

The OXO system combines functionality with design, featuring a unique leg detail. Its visual simplicity transforms any office into a workspace promoting organisation and space efficiency

Seating: T-Sit Chair

OXO includes an extensive range of storage

Desks are adjustable from 680 to 820mm

OXO comes as standard in over 40 veneer, laminate, melamine and glass finishes. The end frames are available in many sizes, with more than 12 metallic, textured and standard colours

Easy to assemble with a click

The simple and well designed rectangular 'O' shaped end frame creates a stimulating working environment

Seating: Link Chair

The economical and efficient solution shows the system using one central end frame supporting two desk tops

The 'Π' shaped end frame adds yet another dimension to the 'OΠ' range

A range of accessories encourages an organised and ergonomic way of working

The clip-on system easily creates numerous working environments
Seating: T-Sit Chair

Desks are easily connected to storage cabinets creating functional configurations

All storage cabinets are finished in an attractive range of colours. Workstations can be connected to the upholstered back panel of the storage unit

Returns are available for all veneer, laminate, melamine and glass desks

12mm thick, clear toughened glass tops are available in many sizes, for meeting tables and desk arrangements

Meeting tables are available in various sizes and come as standard in veneer, laminate, melamine and clear glass finishes
Seating: T-Sit Chair

Glass desk with return unit and mobile pedestal

Easy to assemble and designed to suit individual requirements

A counter unit and privacy / modesty panel can be attached to all desk units

The clip on function, together with top and leg profile

Upholstered privacy screens are available in different sizes and colours. There are numerous storage units for filing, as well as cabinets with doors and tambour shutters
